# Sponsor Community Science

## About Community Science

Bird Alliance of Oregon's Community Science programs help us gather vital information about threatened and endangered species and connect people to birds and the threats that are imperiling them. This includes Christmas Bird Counts in the Portland Metro region, Snowy Plover and Marbled Murrelet Surveys on the Oregon Coast and Spring Shorebird Surveys in Eastern Oregon.

Planting Semaphore Grass T. Wicks

## Community Science Audience

Each year, volunteers contribute more than 5,000 hours to community science programs. As a sponsor you are not only being seen by our volunteer community, you are enabling us to more effectively accomplish our conservation efforts and help influence public policy. **See more about our general audience and reach.**

**Visit the Community Science Website**
